## Entity Relationship Diagram

```
graph LR; Users[Users] --> Questionnaires[Questionnaires];
```

The diagram illustrates the relationship between two entities: **Users** and **Questionnaires**.

**Users Entity:**

- Primary Key (PK): user\_id
- Attributes: name, email, password, created\_at, updated\_at

**Questionnaires Entity:**

- Primary Key (PK): questionnaire\_id
- Attributes: user\_id (Foreign Key), title, paragraph, created\_at, updated\_at

The relationship is a one-to-many association, indicated by the line connecting the user\_id attribute of the **Users** entity to the user\_id attribute of the **Questionnaires** entity. The **Questionnaires** entity has a foreign key (FK1) pointing to the **Users** entity's primary key.
